INTRODUCTION

The BSMO has initiated an effort to bring together experts from different subspecialties to build a consensus electronic document on Immune Related Adverse Events (irAE) that is published on the “ImmunoManager website”. The first objective of this project is to provide comprehensive guidelines on the incidence, symptoms, diagnostic algorithm and treatment for the different types of irAE.

The ImmunoManager is designed to be ready for direct clinical implementation by physicians and can be consulted online. The website will provide case based illustrations for every irAE. A second objective is to organize an electronic forum for the submission and publication of rare or complicated cases of irAE.

All ImmunoManager Guidelines are put together by the BSMO Immuno Task Force based on recent publications and clinical experience.

BSMO Immuno task force

Dr. Sandrine Aspeslagh, Institut Bordet

Prof. Jean-François Baurain, UCL

Prof Oliver Bechter, KUL

Dr. Vibeke Kruse, Ugent

Prof. Bart Neijns, VUB

Dr. Andrée Rorive, CHU Liège
